Record: 7-0

Seven-game capsule: The Packers are the best crew within football along maximum objective measures. They're off to the best start as a Packers crew since 1962 plus have won a franchise-record 13 consecutive games, Oregon Ducks football jersey, dating behind to last December. Their quarterback is having an MVP season, their place-kicker is faultless plus their injury-depleted defense has compensated as some deficiencies with an NFL-high 13 interceptions.

[+] Enlarge Streeter Lecka/Getty Images Aaron Rodgers plus the Packers are 7-0 heading into their bye week. MVP: We could fill up an plenary post with quarterback Aaron Rodgers' statistical accomplishments this season. I'll continue to pound away along my preference Rodgers is leading the NFL within two very disparate categories: completion percentage (71.5 plus yards per attempt 9.9) That means he's completing a greater percentage of passes than always quarterbacks even though he's throwing downfield with more efficiency than anyone else. In his fourth season as a starter, plus sixth surrounded the Packers' current combative invent Rodgers has mastered the position plus is taking it to present heights

Runner-up: There are a lot of candidates on a 7-0 crew so I'll use this zone to reiterate that linebacker Clay Matthews has had a actually strong season, football jersey numbers, even with his absolute of three sacks. I'd debate that he sealed two games as the Packers with characteristic plays: Stuffing New Orleans Saints running behind Mark Ingram on the goal line among Week 1 plus tackling Carolina Panthers quarterback Cam Newton on a fourth-down flee late among Week two And Matthews' escape barricade is a huge reason the Packers are allowing the ninth-fewest rushing yards per game this season.

Biggest surprise: The Packers have actually succeeded among spreading the ball nearly equitably to their unmatched stable of capability players. James Starks has received 55 percent of carries given to running backs meantime Ryan Grant is at 38 percent Based aboard their production, both mathematics are fair Receiver Greg Jennings has caught 42 passes, merely the Packers have five receivers/tight ends who have caught between 11 plus 25 passes. Rodgers has spread his 20 touchdown passes between six different pass-catchers. Jennings has five, nfl throwback jersey, barely Jermichael Finley plus Jordy Nelson have four apiece meantime James Jones has three plus Donald Driver has two.

Biggest disappointment: Nose tackle B.J. Raji has two sacks this season, plus Packers coaches have given him 25 tackles based aboard film repeat But I think maximum of us would accede Raji has had an underwhelming follow-up to his breakout 2010 season. His inconsistent pass rush is an of the reasons the Packers' pass barricade is giving up the second-most yards per game within the NFL. To be equitable other reasons include injuries to safety Nick Collins, hockey jersey sizes, cornerback Tramon Williams plus safety Morgan Burnett. It's also value noting that Raji actually turned it on among the second half of last season. Perhaps the same object longing happen in 2011.

Stat to note: Rodgers is averaging 30.3 yards on his 20 touchdown passes. Four have been longer than 70 yards, plus he's the third player since the 1970 merger to throw a 70-plus yard touchdown among three consecutive games. (Sorry, that's extra than an stat. Couldn't support it.)

Looking ahead: The Packers are going to the playoffs, presumably as the NFC North champions. The real question is if they'll safe home-field advantage as the No. an seed plus whether they can do it with a faultless 16-0 disc I discern three latent pitfalls: Week nine by the San Diego Chargers, Week 12 by the Detroit Lions plus Week 13 by the New York Giants. Feb 18th 2011 NFL Draft: Analyzing the Success Rate of Mid-Round Picks
AUTHOR: Latif Masud | IN: Analysis | COMMENTS: None Yet |

Are mid-round picks a comely place to find NFL aptitude?

We are about three weeks into the NFL offseason, which means that the only huge NFL accident left on the almanac is the design Fans across the country are both jeering their picks, sports jersey, reading up aboard scouting report alternatively drawing up scenarios among their brain Most of these scenarios and mocking usually just involve 1st and second circular picks simply for they are fairly easy to predict At the same period 3rd and 4th circular picks?athe medial circular picks? aare constantly ignored, even notwithstanding these picks arise to have a ton of sum.

Think of it this way: last annual the Baltimore Ravens landed a former Pro Bowl receiver as a 3rd round blueprint choice and change The New York Jets landed a former All Pro cornerback as about the same cost This trend of trading away these mid circular picks are quite common surrounded the NFL, kentucky basketball jersey, New York Jets T-Shirts, but the question is who gets the better end of the handle Is it the team that received those picks alternatively the team that received the proven NFL veteran?

Of lesson, new football jerseys, each situation is alter and the crew receiving the design elect doesn't always receive the better annihilate of the deal neither does the team receiving the former Pro Bowler. Last yearly the crew receiving the player got the better annihilate of the deal with the Jets receiving a great complementary corner to Darrelle Revis and the Ravens finally getting a digit one receiver.? However, usa basketball jersey, that hasn't always been the case.

Take, for example the handle Cleveland made to send a third circular elect and cornerback Leigh Bodden to Detroit a couple of years ago Rogers is no longer surrounded the roster and had been inconsistent at best among his period within Cleveland. In corner the Lions turned that elect into Cliff Avril, nike nfl jerseys leaked, a player that has been one of the top two bag guys aboard the crew since entering the union and notched nine sacks last season.

The fact is that there is no consistent, blank basketball jersey, universal access of measuring which crew got the better annihilate of the handle However, we can take a discern behind at past drafts and find out impartial how much 3rd and 4th circular design picks are successful. Doing so would give us, basketball jersey creator, the fans, a common sense of how much amount these often forgotten, nike football socks, but critically important chart picks are.

Before I even get into how much of the medial round picks I consider to be successful, I think its best to share my criteria of what I considered to be a ?ãsuccessful?À elect To me, nfl football jersey, a 3rd alternatively 4th circular elect is successful whether the player lasted at least four seasons among the NFL, and started at least one alternatively significantly contributed as a backup I deem that this is a comely definition as a ?ãsuccessful?À calling simply because this is usually the term of their first contract, and if a player can entirely activity out a contract, create your own hockey jersey, subsequently he is in some ways moderately successful.

Below are charts of players drafted surrounded the 3rd and 4th circular that I think are successful from every year?¿s blueprint between 2002 and 2006. I chose this period of period for it means that they have had enough time surrounded the NFL to evidence themselves and start surrounded

the NFL.

2002 3rd Round Successes 2002 4th Round Successes Fred Weary Andre Goodman Alex Brown Brian Williams Ben Leber Will Witherspoon David Gerrard Dave Zastudil Melvin Fowler Josh McCown Randy McMichael Jarvis Green Akin Ayodele Brian Westbrook Kevin Curtis Larry Foote Chris Hope Seth McKinley Najeh Davenport Rocky Boiman Terrence Metcalf David Thorton Overall 11/33 Overall 11/36 2003 3rd Round Successes 2003 4th Round Successes Cory Redding Lance Briggs Dominick Davis Bradie James Jason Witten Gerald Hayes Shaun McDonald Todd Johnson Nate Burleson Vince Manuwai Jarret Johnson Seneca Wallace Kevin Curtis Derrick Dockery Terrence McGee Montrae Holland Ricky Manning Chris Crocker George Wrihster Matt Wilhelm B.J. Askew Kenny Peterson Asante Samuel Juntin Griffith Sam Williams Visante Shiancoe Ian Scott Jeremy Johnson Chirs Brown Angelo Crowell Ike Taylor Brandon Lloyd Justin Fargas Chris Simms Ovie Mughelli Overall 18/33 Overall 17/35 2004 3rd Round Successes 2004 4th Round Successes Darnell Dockett Nate Kaeding Shaun Philips Demorio Williams Stuart Schweigert Gilber Gardner Reggie Torbor Alex Stepanovich Randy Starks Max Starks Jerricho Cotchery Nathan Vasher Bernard Berrian Chirs Cooley Isaac Sopoga Will Allen Stephen Peterman Sean Locklear Robert Geathers Mewelde Moore Matt Schaub Anthony Hargrove Ernest Wilford Stacy Andrews Travelle Wharton Landon Johnson Jason David Brandon Chillar Overall 14/33 Glenn Earl Jared Allen Overall 16/37 2005 3rd Round Successes 2005 4th Round Successes Frank Gore Oshiomogho Atogwe Sean Considine Kyle Orton Charlie Frye Andrew Walter Marion Barber Brandon Jacobs Channing Crowder Justin Tuck Travis Daniels Ray Willis Kirk Morrison Richie Incognito Jerome Mathis David Stewart Eric Green Chris Henry Kerry Rhodes Jason Brown Ellis Hobbs Trai Essex Brady Poppinga Todd Herremans Adam Snyder Dominique Foxsworth Darren Sproles Eric Ghiaciuc Leroy Hill Dustin Colquitt Duke Preston Chauncey Davis Nick Kaczur Alex Smith Chris Canty James Sanders Evan Mathis Sione Pouha Overall 18/34 Overall 20/33 2006 3rd Round Successes 2006 4th Round Successes Charles Spencer Eric Winston Owen Daniels Max Jean-Gilles Brandon Jones Chris Gocong Ko Simpson Jahri Evans Leonard Pope Jason Spitz Jason Avant Stephen Tulloch Jerious Norwood Clint Ingram Leon Washington Stephen Gostowski Charlie Whitehurst Freddy Keiaho Brandon Marshall Elvis Dumervil Jason Hatcher James Anderson Ray Edwards Rob Sims Eric Smith Willie Colon Domata Peko Overall 13/33 Barry Coefield Overall 15/34

Now that I have listed always of the blueprint picks that I think have been successful, baseball jersey sizes, we can see at some numbers. To begin, there were 165 3rd round picks between 2002 and 2006. Out of those picks, 76 were deemed to be successful based on the formula aboard four seasons among the NFL, 1 starting alternatively significant contributions). That means that about 46% of the 3rd circular picks within that five year period were considered to be successful.

Looking at the 4th circular there were 176 absolute draft choices in the five yearly span we're talking nearly Out of those 176, 77 were thought to be successful, which gives us a rate of almost 44% of 4th rounders being successful. So, nfl jerseys authentic, while a team trades away a 3rd circular elect as an aging player, there is basically a 50/50 chance that the player they will be drafting longing be an NFL starter or a significant contributor.

Of lesson teams don't trade away players as chart picks without reason. More often than never it is as the team can no longer afford that player like Arizona couldn't afford Anquan Boldin or was also cheap to pay him). Other times, its for of the off the field issues that a player has issues that the new crew simply doesn't absence to handle with, Coyotes Jerseys, nike nfl contract, which was the case with Antonio Cromartie and the Chargers.

In either case, authentic football jerseys, the crew that trades away the player receives something in return, nike custom football jerseys, which is not always the case as the team getting the player, customized football jerseys, champion basketball jersey, and statically one in two chances that a player turns out to be something aren't bad odds at always Therefore, it makes a lot of sense that NFL general managers boat away perennial Pro Bowler as what is deemed a cheap

price?;À at the duration.
